Ecosysteemdiensten

KNMI scenario's

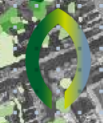

BomenMonitor

Climate scenarios (IPCC)

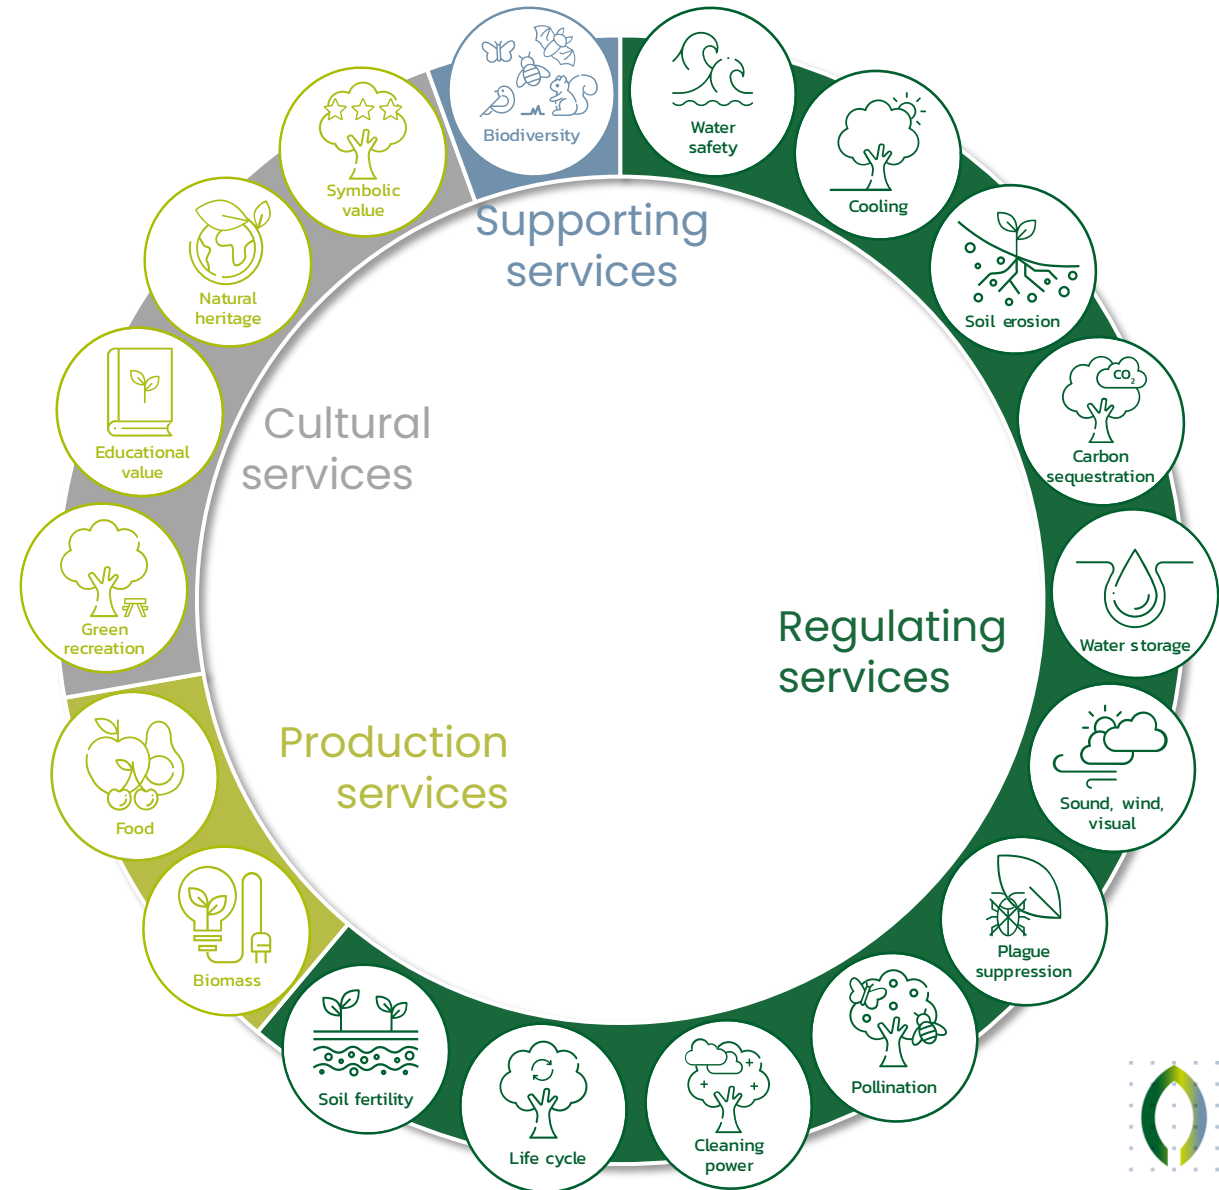

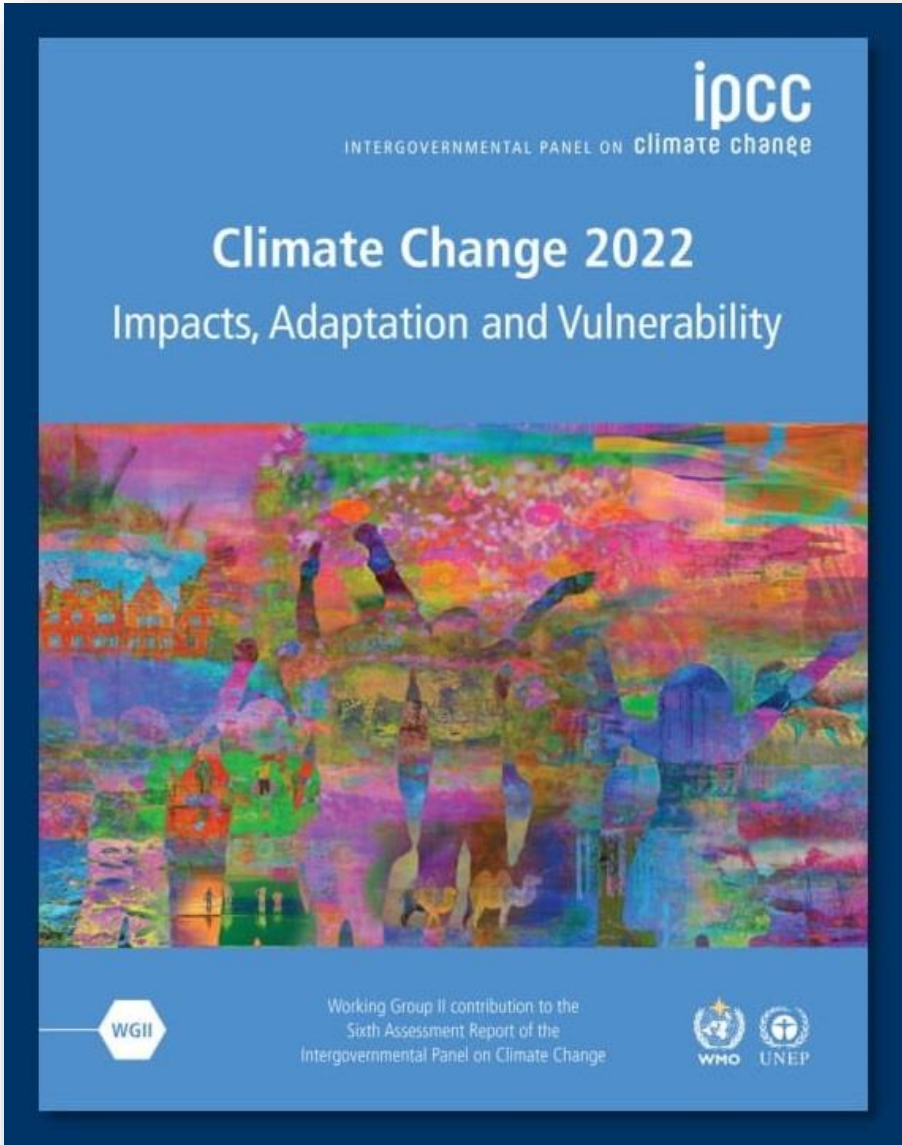

Can we predict climate change and the effects per tree?

BomenMonitor

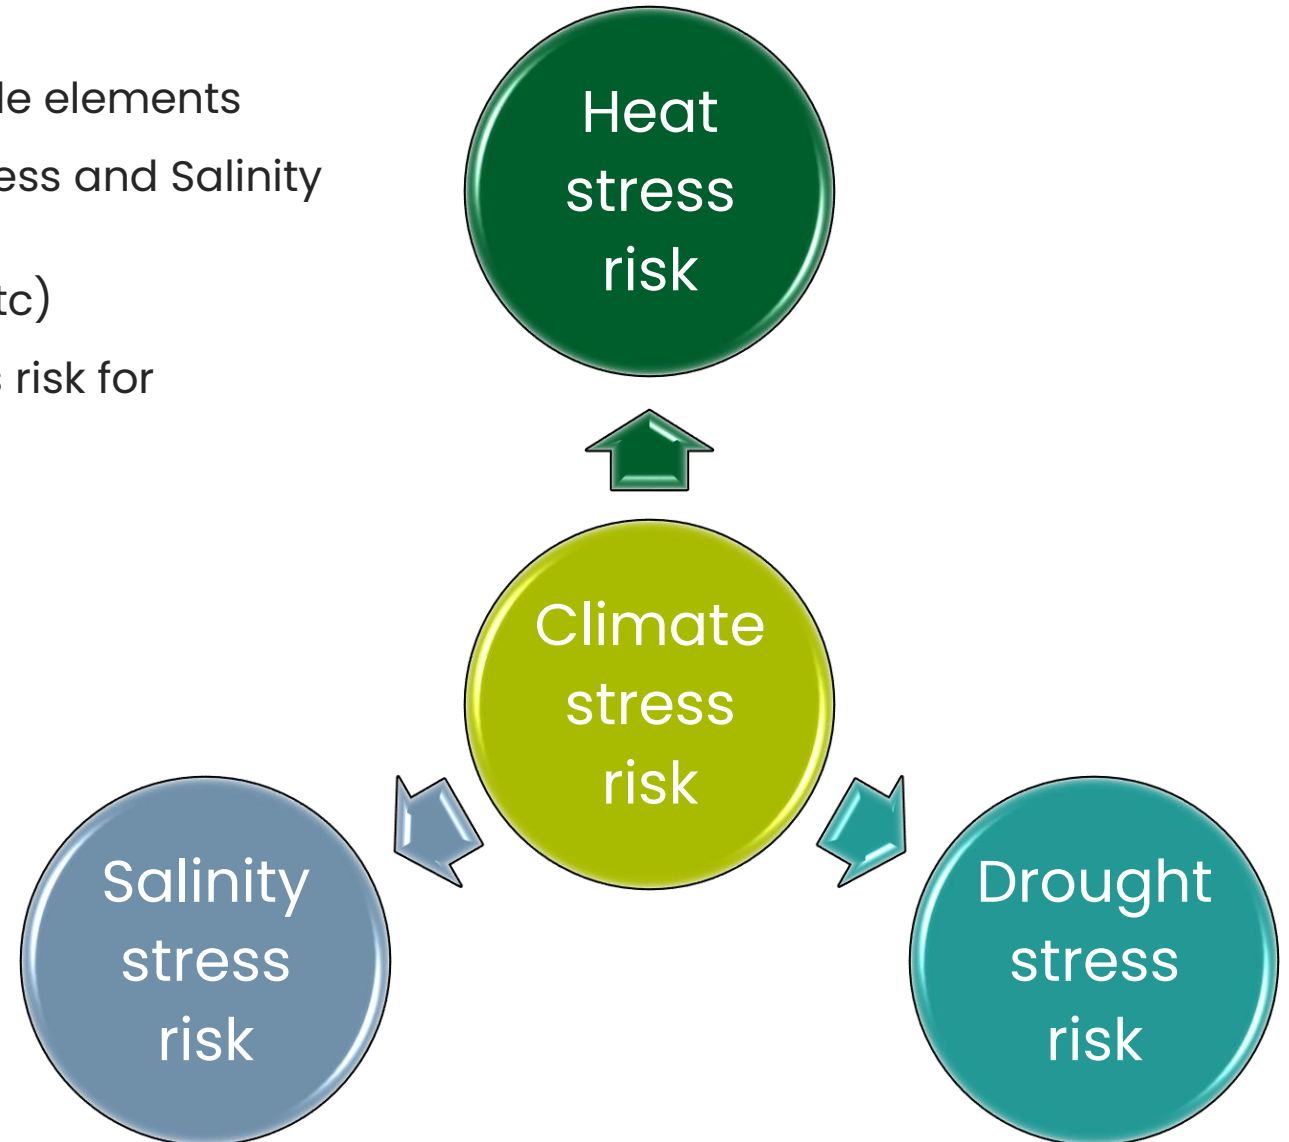

+ climate change, + info on ecosystem services

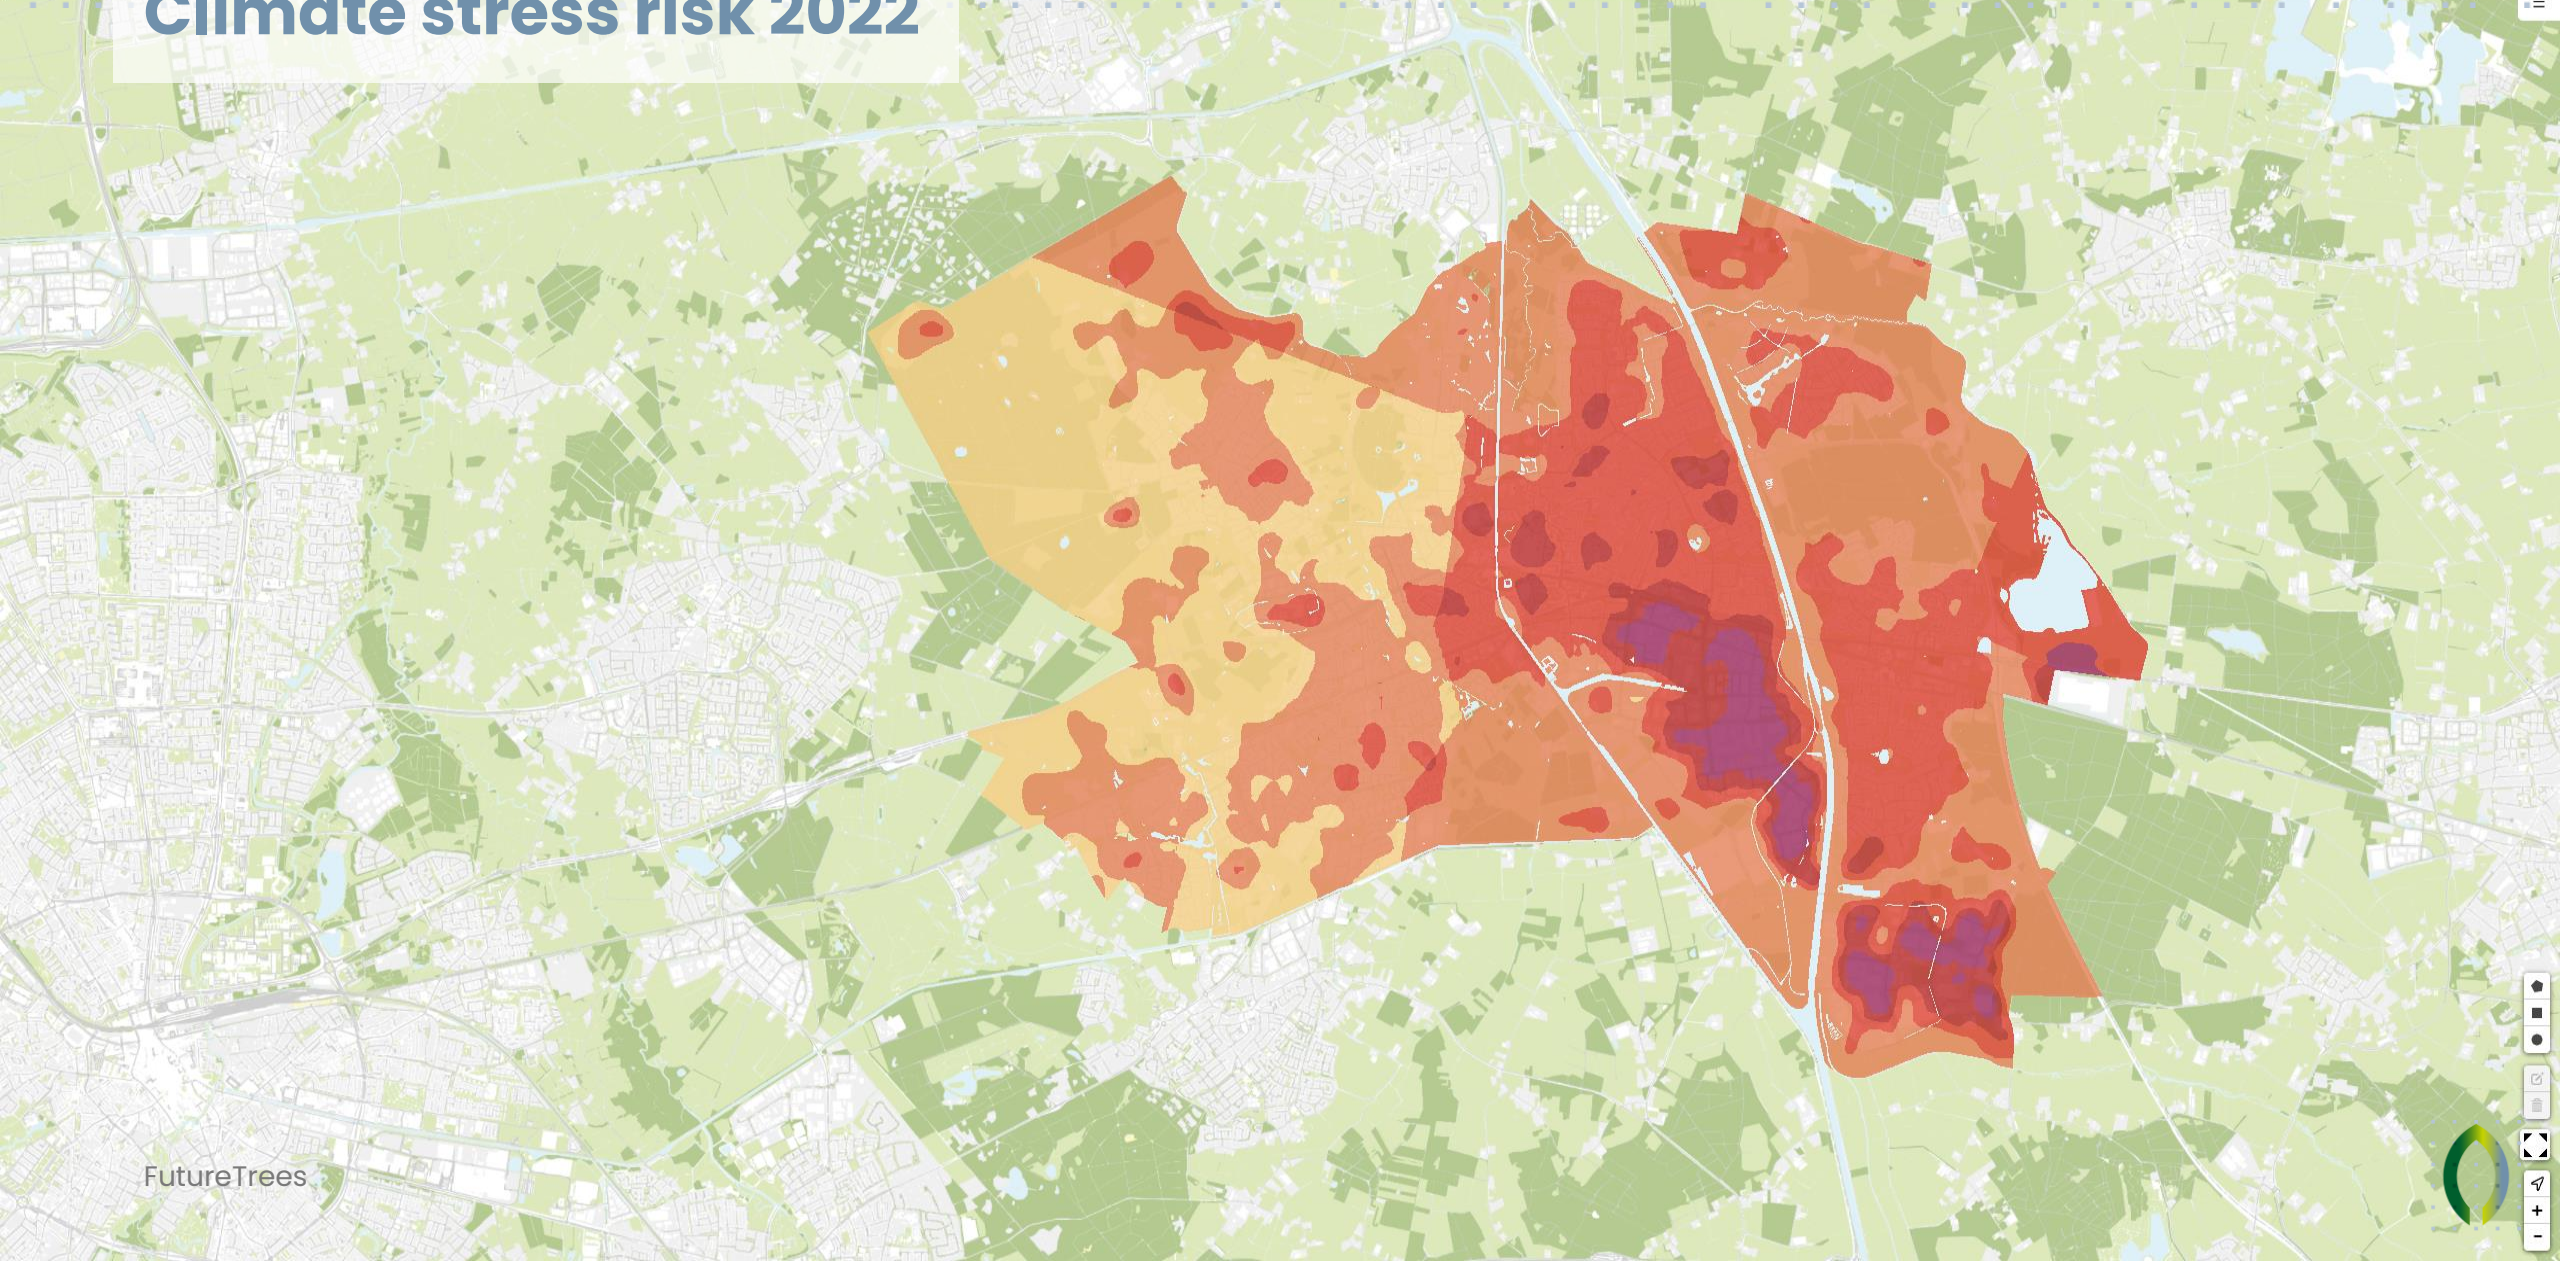

What is that, climate stress risk?

- Climate stress is big! Dependent on multiple elements
- Currently based on Heat stress, Drought stress and Salinity stress
- More risks in the making (flooding stress, etc)
- It defines, per area, what the climate stress risk for vegetation is

cobra GROENIN

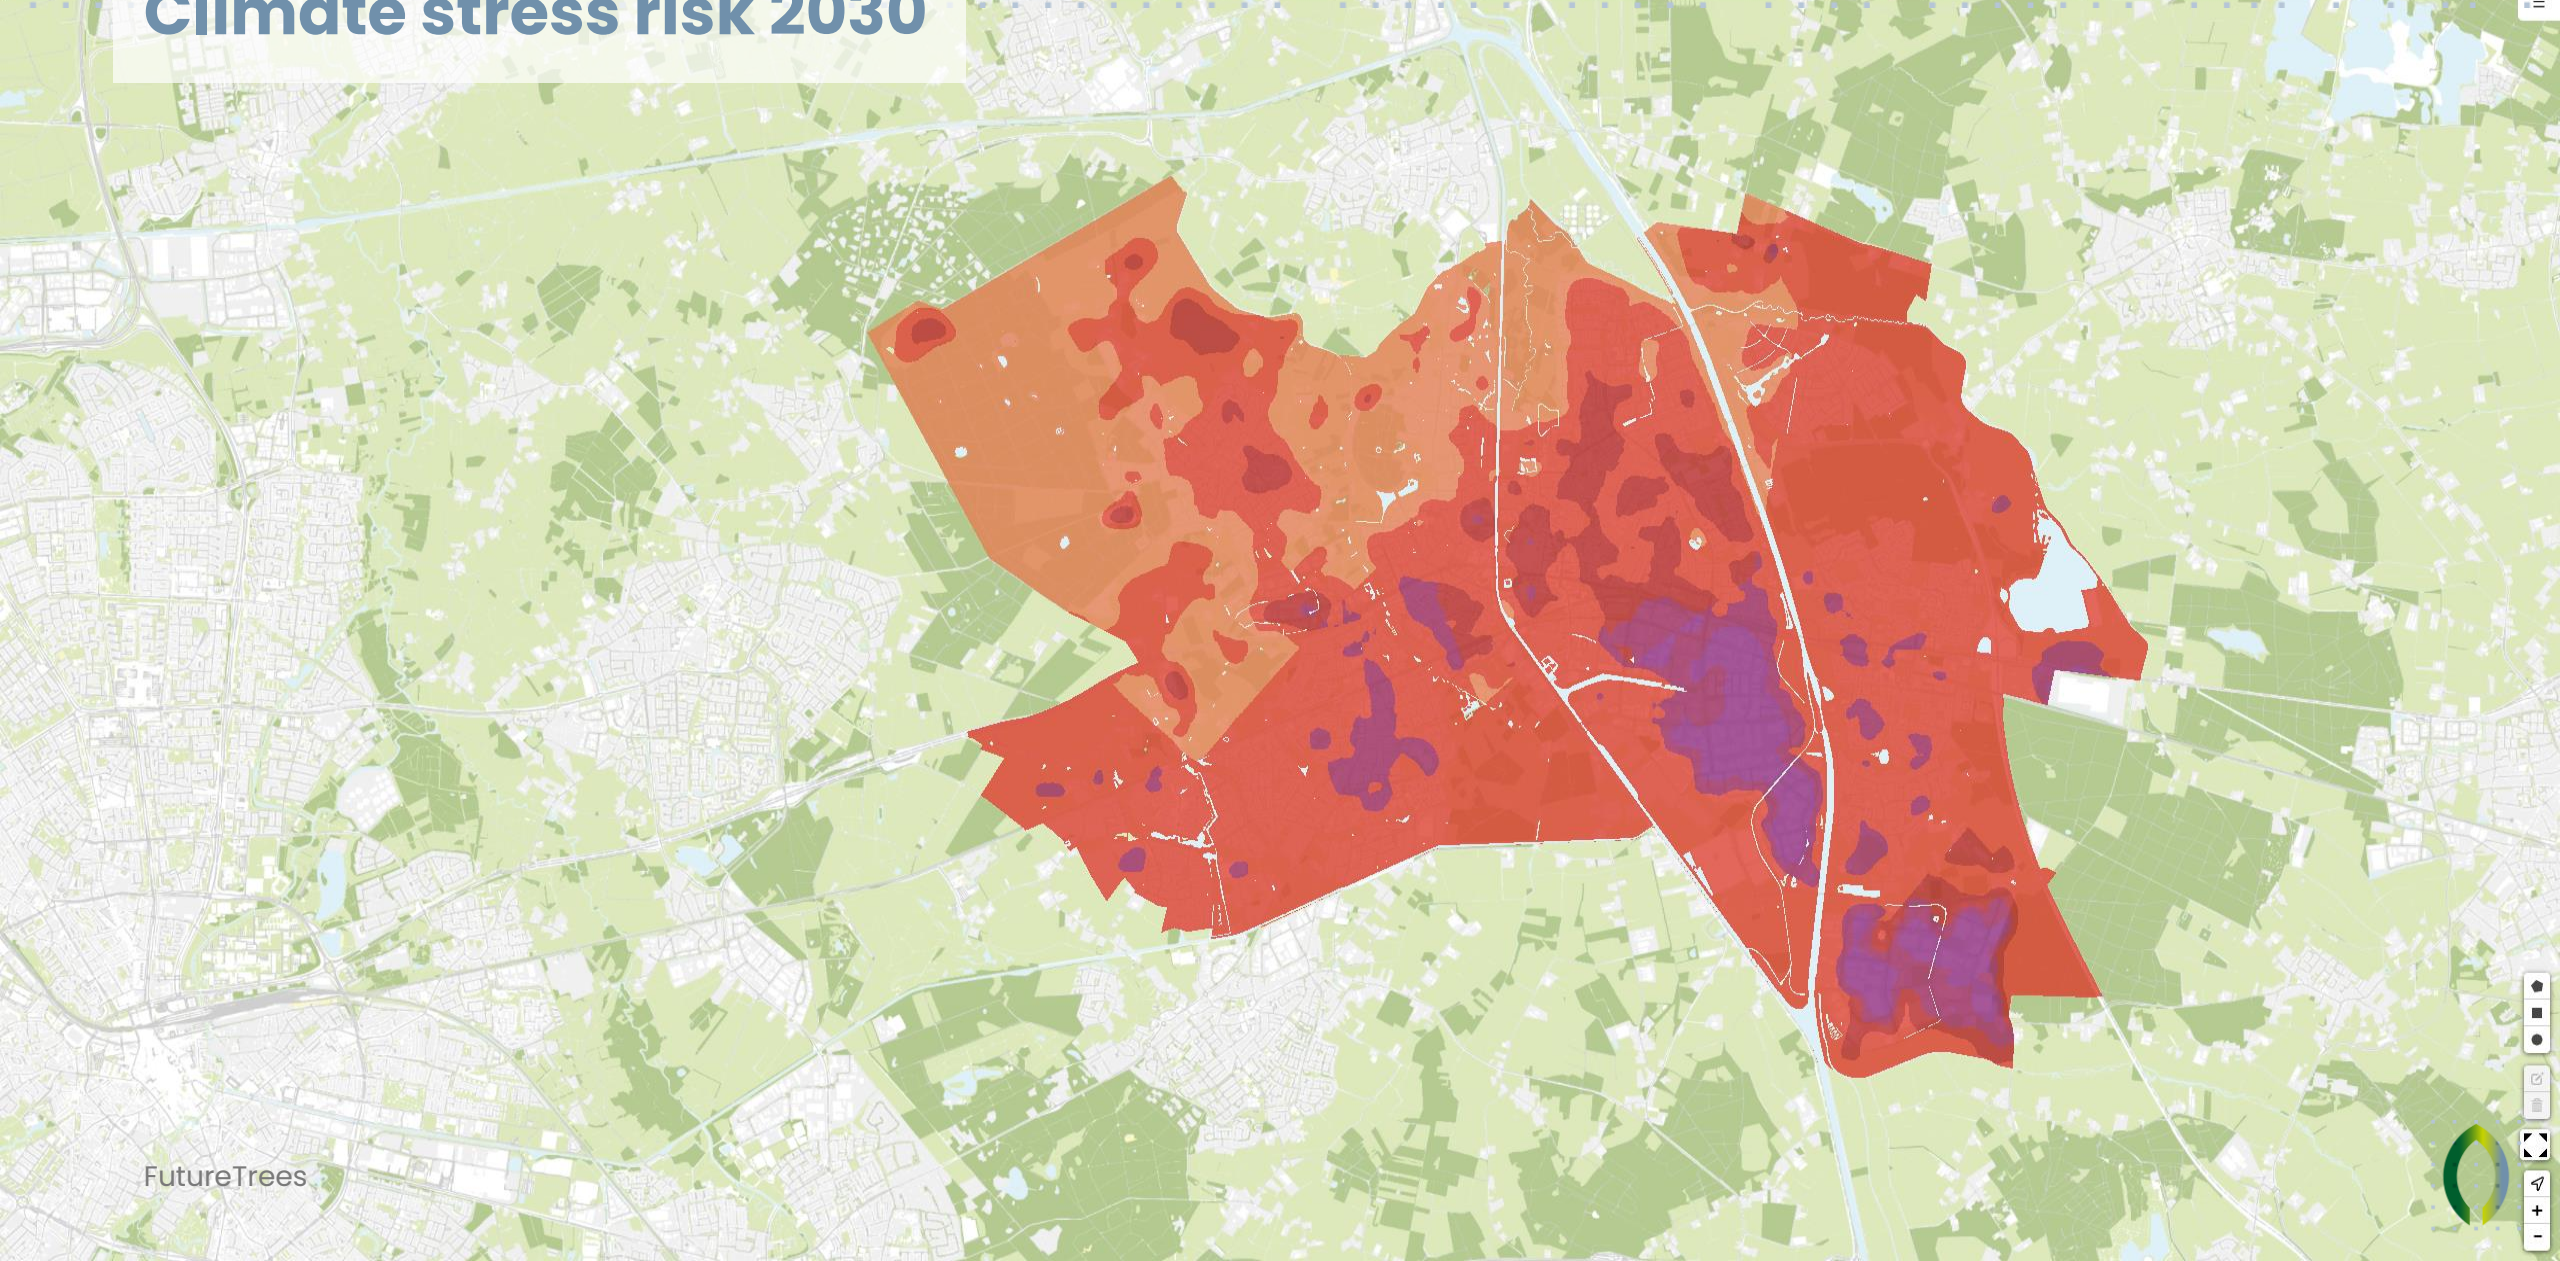

Climate stress risk 2022

FutureTrees

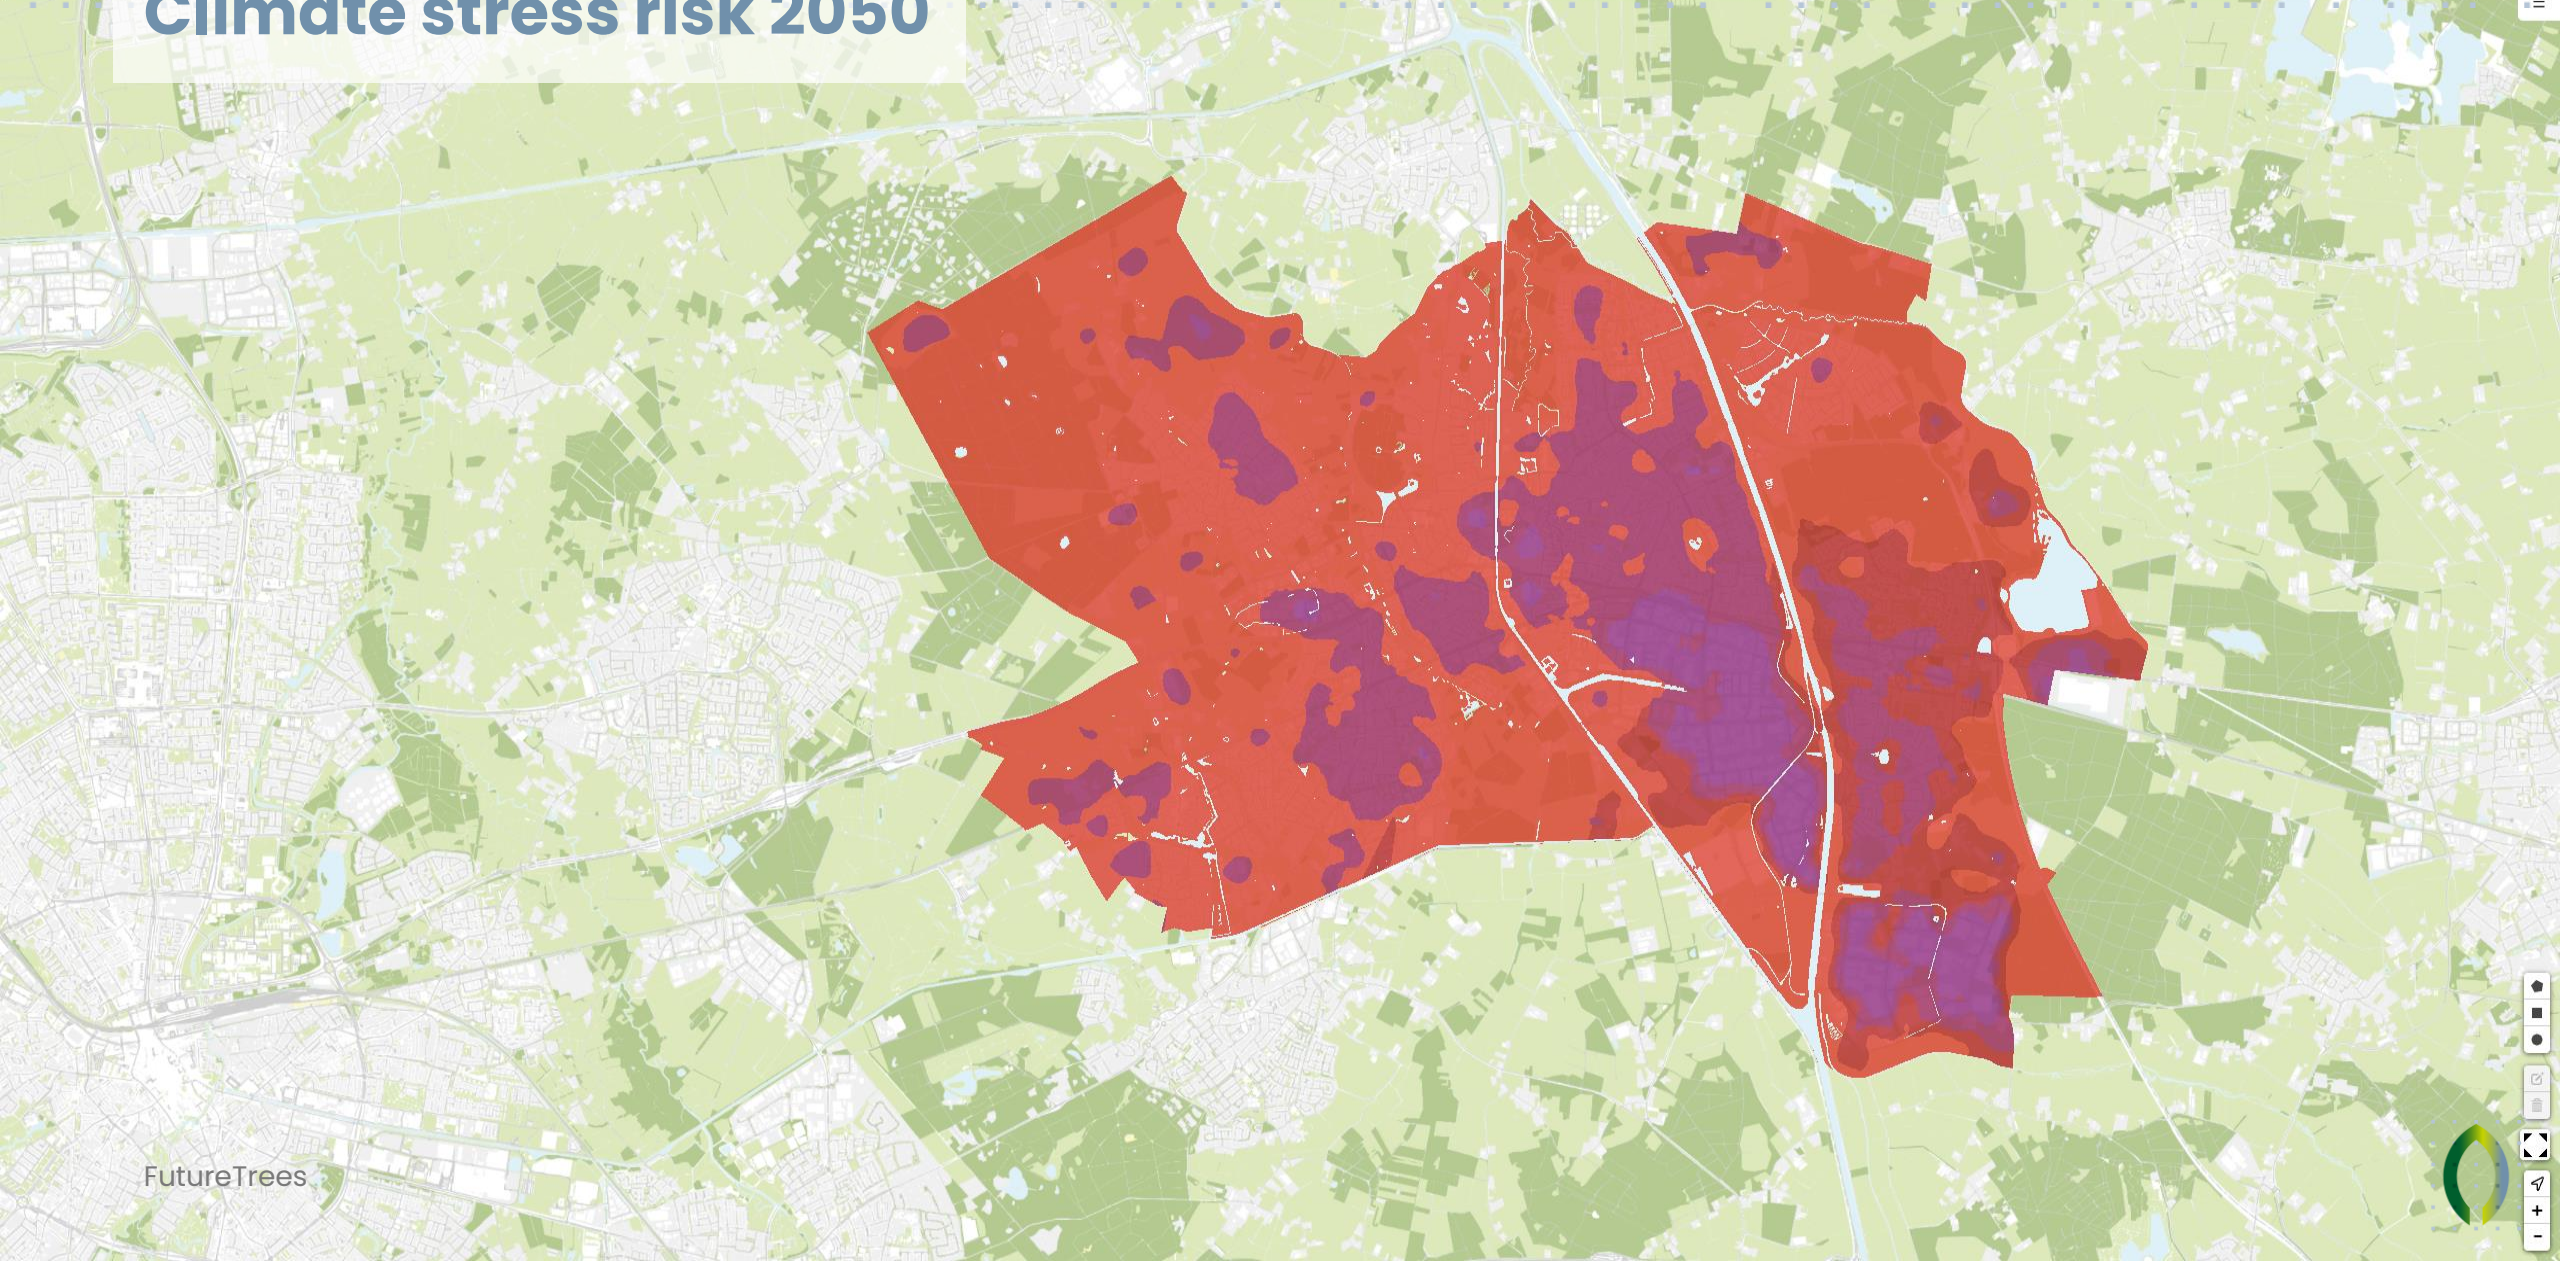

Climate stress risk 2030

FutureTrees

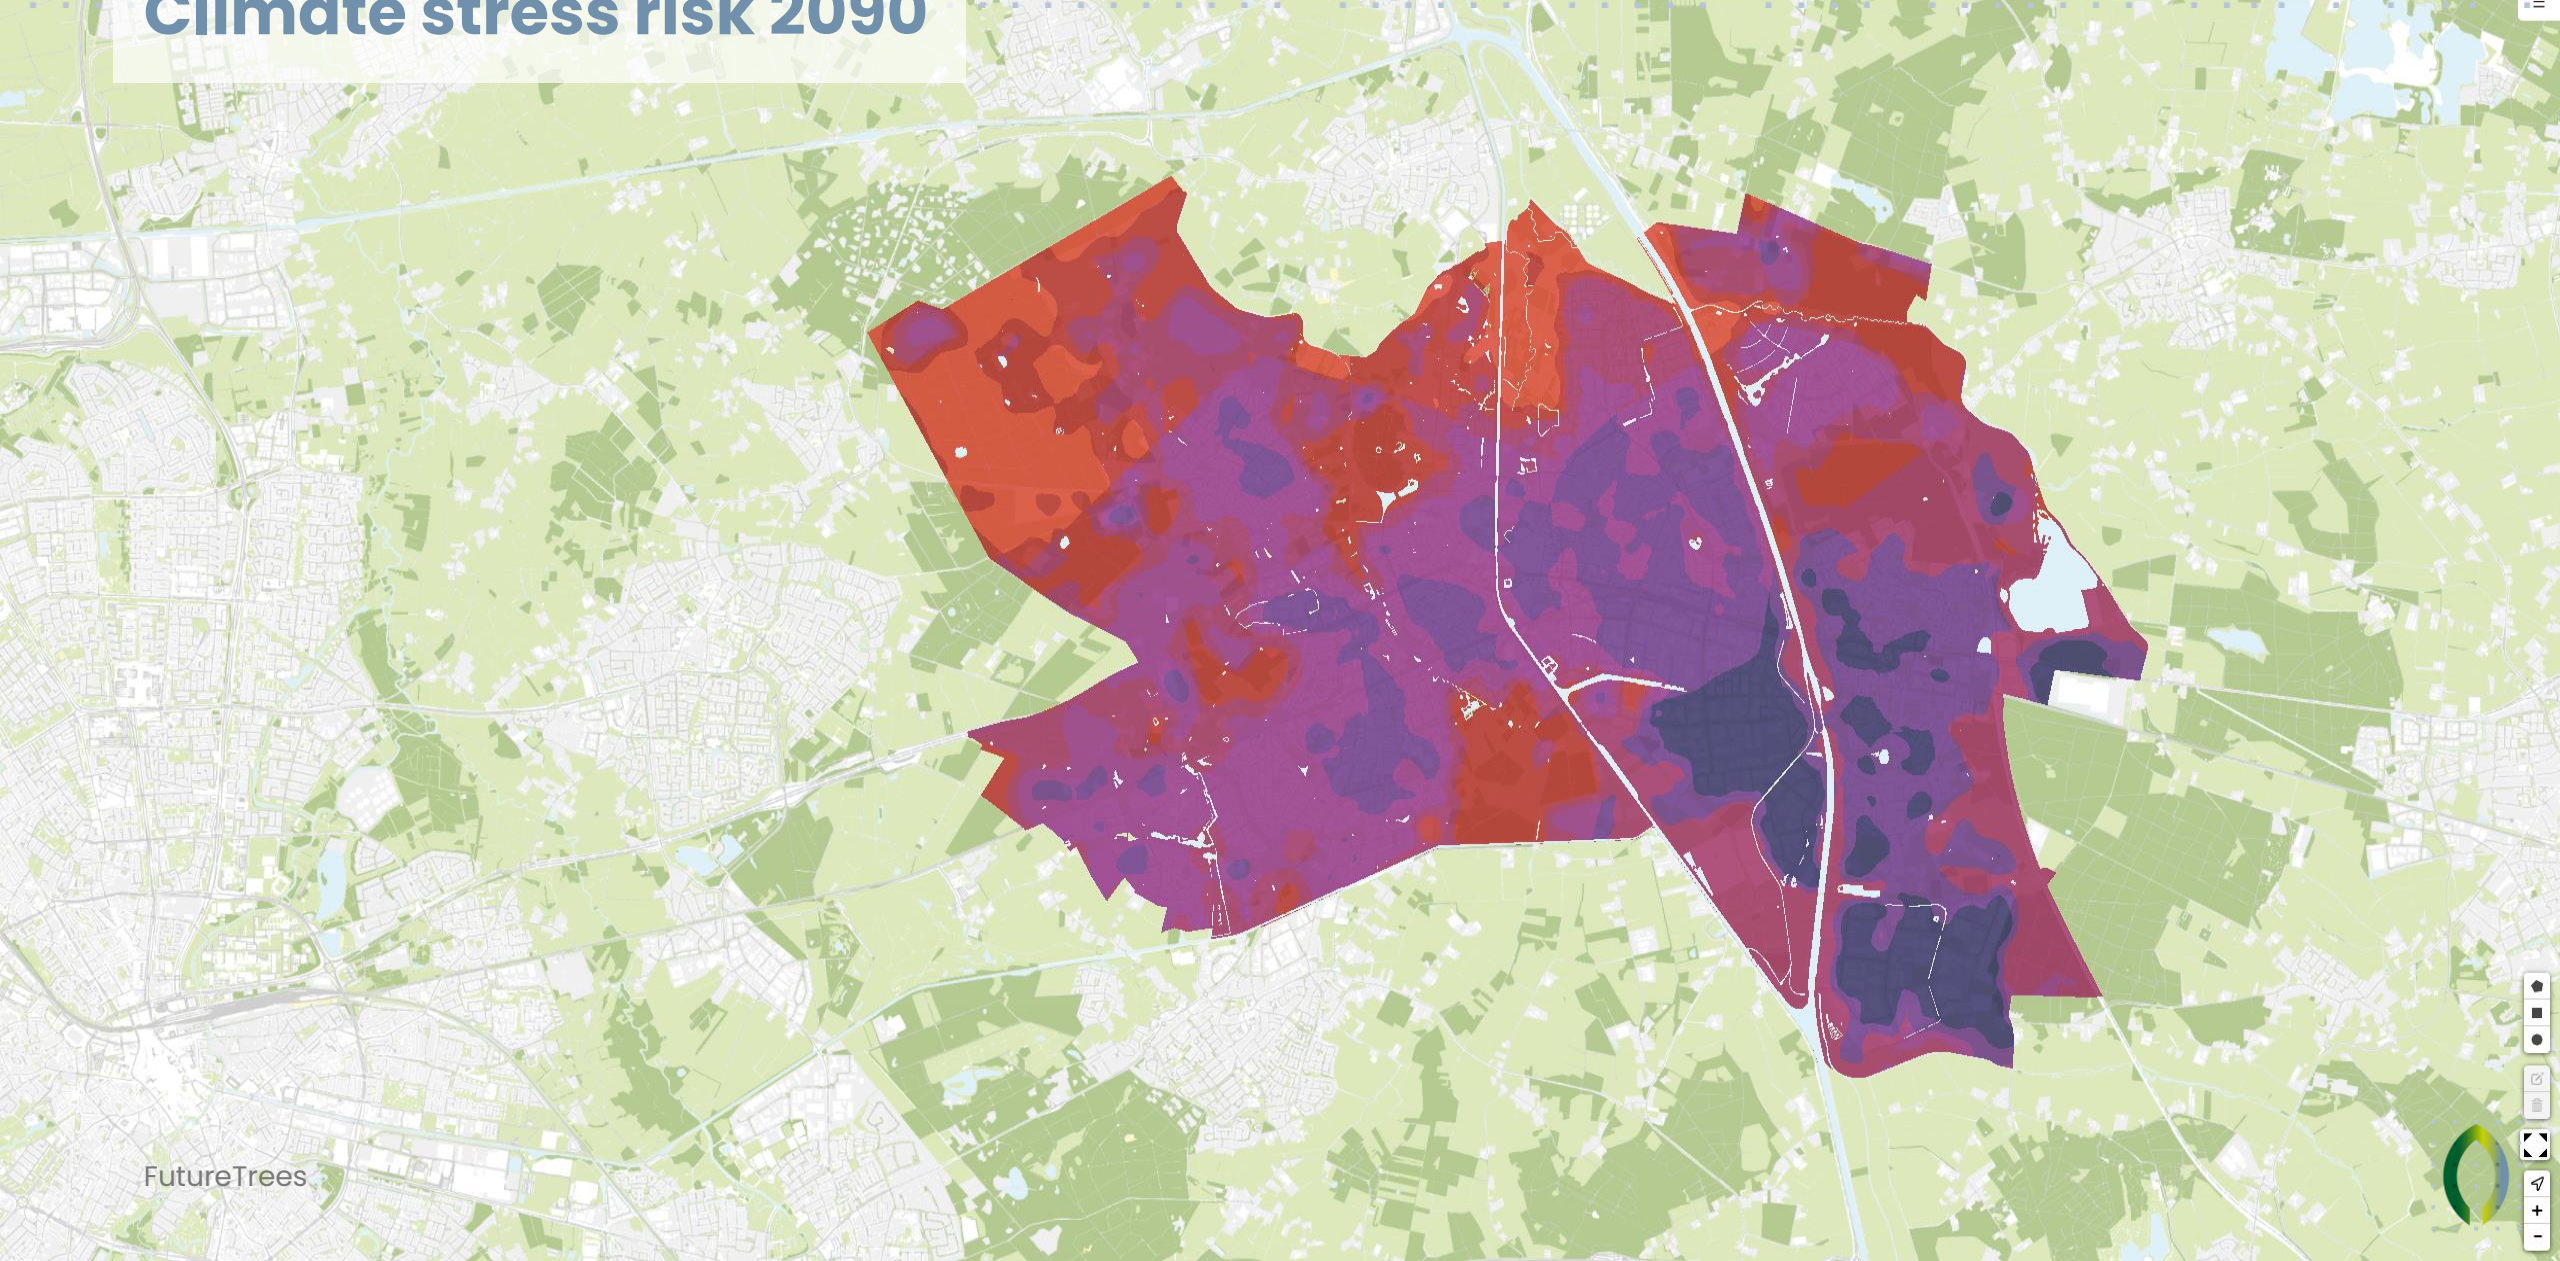

Climate stress risk 2050

FutureTrees

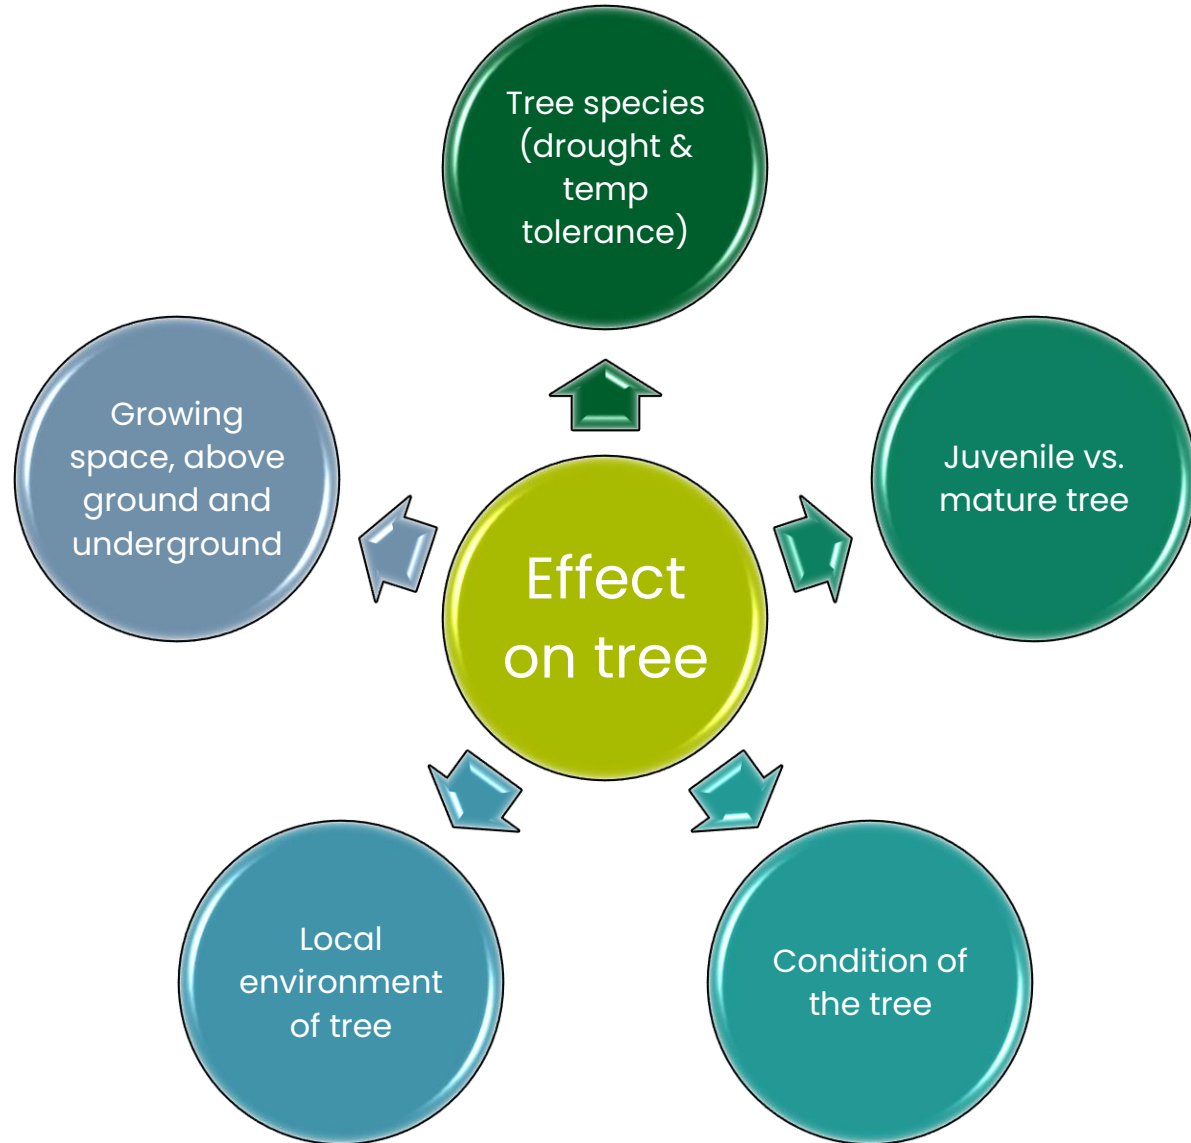

Climate stress risk 2090

Climate stress has different effects on different trees

- Different aspects taken into account to address individual climate stress on trees:

Climate stress per tree

Aantallen Dashboard

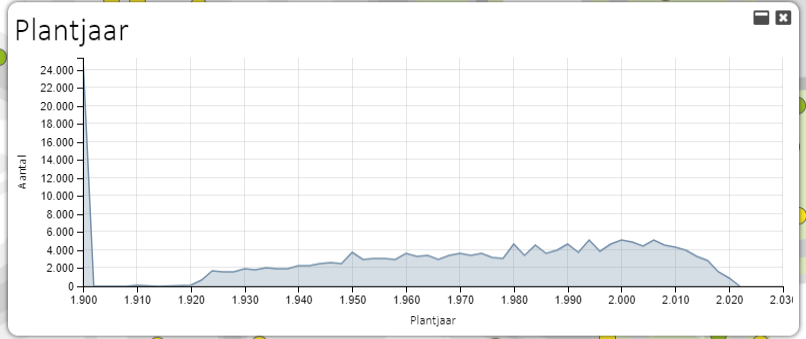

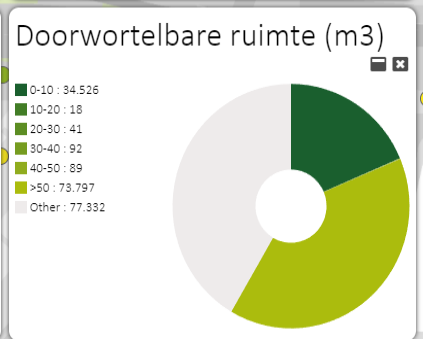

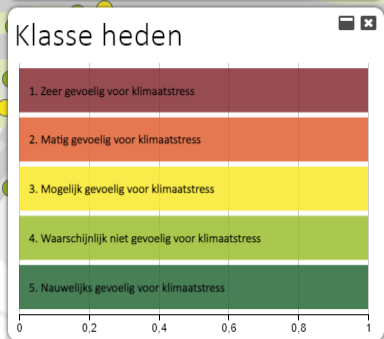

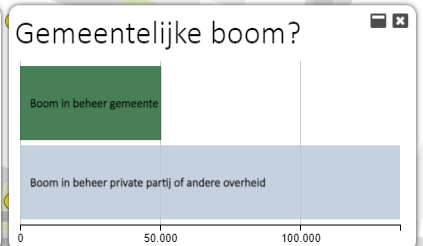

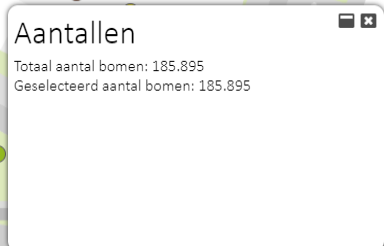

Totaal aantal bomen: 185.895
Geselecteerd aantal bomen: 185.895

Aantallen Selection

Totaal aantal bomen: 185.895
Geselecteerd aantal bomen: 15.463

ID: 57827efd-48a7-4905-875a-e044eebcfe2
Boomsort: Platanus x hispanica
Boomhoogte (m): 6
Boomkroonoppervlak (m2): 13
Stamdiameter (cm): 11
Aanlegjaar: 2000
Standplaats: open verharding
Doorwortelbare ruimte (m3): 127
Klimaatstress heden: 4

Klimaatstressbestendig
5 4 3 2 1

Klimaatstress 2030: 4
Klimaatstressbestendig
5 4 3 2 1

Klimaatstress 2050: 4
Klimaatstressbestendig
5 4 3 2 1

Klimaatstress 2090: 3
Klimaatstressbestendig
5 4 3 2 1

Heeft deze boom last van klimaatstress?
Nee.
Krijgt deze boom in de toekomst last van klimaatstress?
Ja, deze boom heeft klimaatstress.
Probeer de omgeving af te koelen door te vergroenen of waterelementen toe te voegen. Geef de boom voldoende water in warme periodes. Is dit een jonge boom?
Nee.
Is deze boomsoort droogtetolerant?
Ja, deze boomsoort is matig droogtetolerant.
Heeft deze boom nog voldoende doorwortelbare ruimte?
Ja, de situatie is optimaal.
Heeft deze boom in de toekomst nog voldoende doorwortelbare ruimte?
Ja, de situatie is optimaal.
Staat deze boom in een goede standplaats?
Nee, deze boom staat in verharding.
Probeer de omgeving minder versteend te maken (tegelippen) of verbeter de waterinfiltratie. Vermijd stroolruiz in de directe omgeving.
Heeft deze boom een goede conditie?
Ja, deze boom heeft een goede conditie.

To be enhanced!
