SHAPING THE FUTURE OF TERRITORIAL MANAGEMENT WITH COPERNICUS DATA

### Description

- Goal: Present various SME solutions to European public procurers of all types (local, regional, national level)
- Date and location : TBD
- Plan:
  - Organization of round tables about Copernicus benefits to increase awareness, understanding, and appropriation by public authorities of Copernicus through concrete use case example
  - Promotion of business development for companies that have already developed services using Copernicus data through the presentation of use cases
  - > Promotion of available platforms and mechanisms to procure services using Copernicus data
  - > Increase networking between clusters and European public authorities
